Who is the WCC?

The Oklahoma Workers' Compensation Commission ("WCC") was created by the Administrative Workers' Compensation Act of 2013 and is responsible for the administrative adjudication of all work injuries occurring on or after February 1, 2014. The agency also enforces workers' compensation coverage requirements for employers and issues and regulates workers' compensation self-insurance permits for employers and group associations.

The WCC is headquartered at the Denver N. Davison State Office Building located at 1915 N. Stiles Avenue, Oklahoma City, and maintains an office and hearing rooms in downtown Tulsa at 201 West Fifth Street.

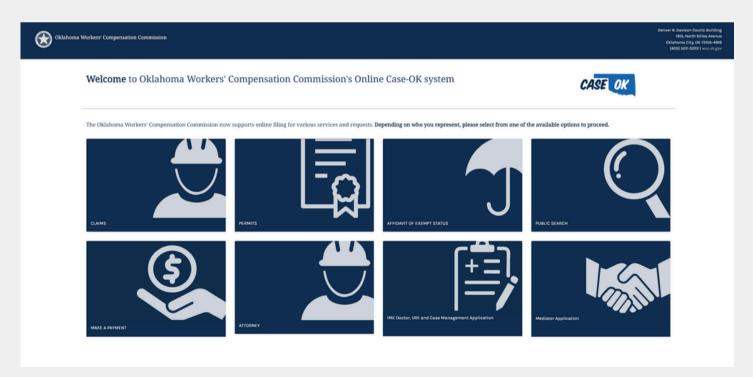

What's New at the WCC?

The WCC is proud to announce the completion of a major digital transformation project that expands services provided to all Commission stakeholders. This new application, CaseOK, is now fully online. CaseOK provides greater accessibility, transparency, and reduces costs associated with a traditional paper-based filing system. Internally, CaseOK also creates workflow efficiencies that connect all of our divisions into one synchronized system.

External CaseOK users enjoy easier access to records and can search the entire records databases for the WCC and Court of Existing Claims online without having to come to the Commission offices in person. Permit applications and fees can be filed and paid for online through CaseOK, and attorneys can now file, review dockets and orders for their cases, and access filed pleadings from their online attorney dashboard.

The success of CaseOK is evident by its high online filing adoption rates (over 90% of all new cases are filed in CaseOK), swift pleading file-stamped receipt delivery (often within an hour of filing), and increased efficiencies in processing permit applications and renewals. The notable reduction in manual tasks and paper filings showcases this application's pivotal role in modernizing our processes at the Commission to the benefit of all Oklahomans.

How Does The Workers' Compensation System Operate in Oklahoma?

The Workers' Compensation "Grand Bargain" represents an agreement between employers and employees: employers agree to provide benefits to employees injured on the job, and employees agree to accept those benefits and forego civil litigation against the employer. With the basis of this agreement in place, the next question is how do businesses pay for it?

Self-Insured

Employers that are fiscally sound can elect to cover the costs of workers compensation themselves. They are known as "Self-Insured Employers". Employers can form industry groups and collectively pool their resources to cover the cost of workers compensation. These groups "Group Self-Insurance known as Associations". Employers can elect to hire Third Party Administrators to manage workers' compensation claims for their business.

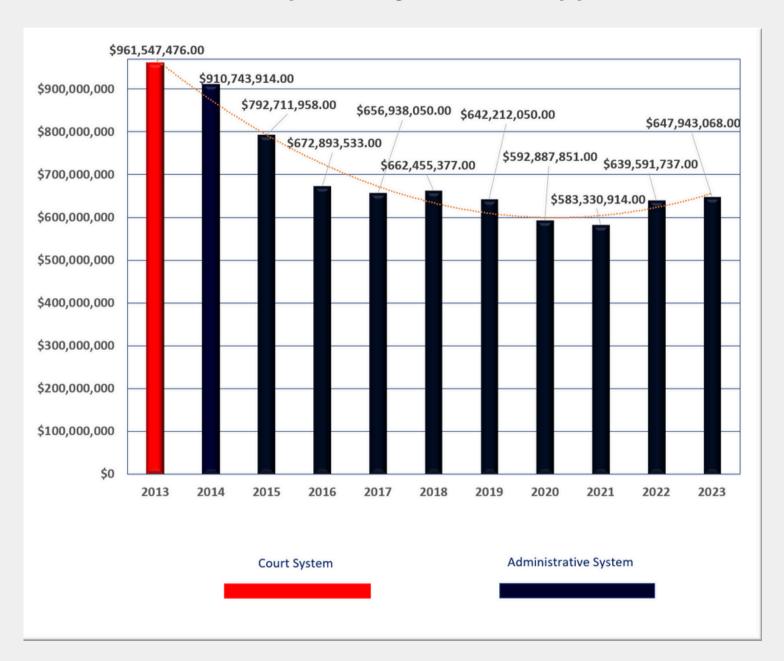

Insurance

Many employers purchase a workers' compensation policies through private insurance companies. The insurance industry takes on the bulk of the responsibility for directing the payments of medical care and lost wages due to injuries on the job.

In this graph we see that private insurance companies processed about 74% of the total workers' compensation claims in 2022 and 2023.

What is the total cost of purchasing a workers comp premium?

The chart above shows total Workers' Compensation premiums written in the state, and demonstrates a clear downward trend since the institution of reforms beginning February 1, 2014. The number of insurance companies writing premiums in 2023 has risen to 300 insurance companies from 260 in 2014.

What is the Workers' Compensation Commission's Role in the System?

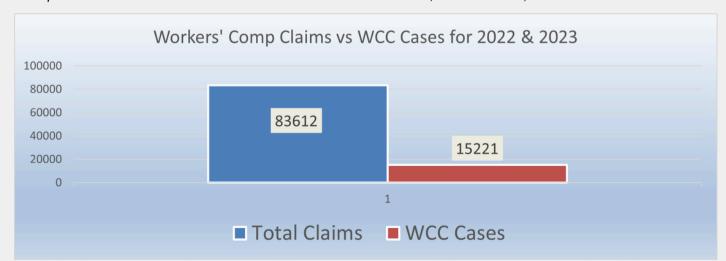

The Workers' Compensation Commission (WCC) supports the workers' compensation system as provided in statue under <u>Title 85A</u>.

Disputes

The WCC is empowered to help parties settle disputes that arise in the workers' compensation system. The WCC has two main avenues to settle disputed claims. One route is through mediation. Both sides can sit down and work out an agreement with a Commission-approved mediator. Alternatively, matters may also be resolved in a trial, heard and decided by a Commission administrative law judge. Mediation is often a faster and more cost-effective way to resolve disputed claims. Most cases that are filed with the Commission are settled through mediation.

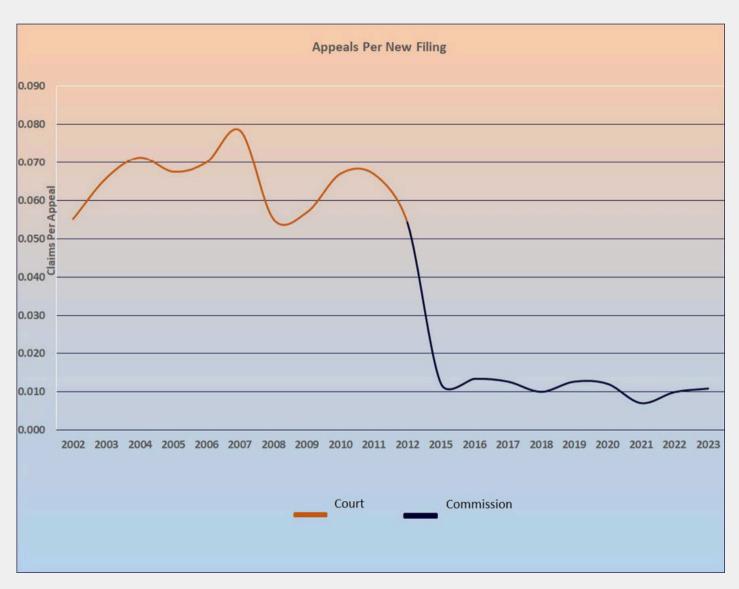

The chart above shows case disposition trends at the WCC since its inception. "Dispositions Without Trial" Includes Joint Petitions, Dismissals, and Denials.

In this chart we see that most claims are processed by Insurance and Self-insurance entities without the WCC needing to be involved.

Appeals

The chart below shows appeals per claim filing. Since the implementation of the AWCA and the creation of the Commission, the number of appeals per claim have decreased dramatically. Appeals are costly for both the claimant and the respondent. Even a delay of only a few weeks to docket the appeal can be significant for an injured worker who is struggling financially and unable to work.

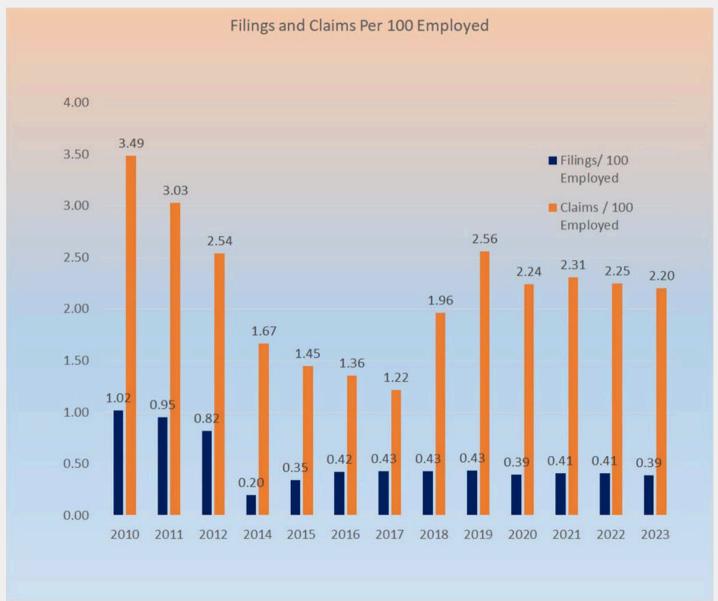

Data from is omitted because the Workers' Compensation Court did not release an Annual Report for that year. 2014 data is omitted because the Commission had not yet been in operation for a significant period of time, so it is not representative of a typical year. Total Commission claim filings in 2014 were 3,541, and there were no appeals filed with the Commission during That year. The Court last released an Annual Report for 2012.

Filings and Claims

This chart shows the total number of cases filed and claims per 100 people employed from 2010 to 2023. After the creation of the Workers' Compensation Commission, the number of filed cases dropped by nearly one half. In 2018, the Commission adopted EDI for Insurance claims reporting. The increased efficiency in claims reporting can be seen in the abrupt rise in claims counted from 2018 onwards. From 2022 to 2023 there was a 1% increase in employment in Oklahoma. Case filings have remained steady while insurance filings dropped slightly.

Data from is omitted because the Workers' Compensation Court did not release an Annual Report for that year. 2014 data is omitted because the Commission had not yet been in operation for a significant period of time, so it is not representative of a typical year. Total Commission claim filings in 2014 were 3,541 and there were no appeals filed with the Commission during that year. The Court last released an Annual Report for 2012.

The pie chart above shows Commission filings in 2023 distributed by cause of injury. The "cause" of the injury describes the actual event or object that led to the injury.
